FDA Cleared Indications for Use

The ThermoSuit is a thermal regulating system.

Indications for use are:

- a. Temperature reduction in patients where clinically indicated, e.g. in hyperthermic patients;
- b. Monitoring of patient temperature.

Patient Population

The ThermoSuit System (Size M) is indicated for patients

- Greater than 58” (147 cm) and less than 75” (190 cm) in height
- And less than 26” (66 cm) in width
